Gateway Center Internship Program

*Site Supervisor: Ashley Latham, 404.215.6611 or alatham@gatewayctr.org*

**Vision**
Gateway Center (GWC) cultivates an internship program that brings about educational and transformative experiences for both the interns and the organization.

**Mission Statement**
GWC internship program serves to teach the interns about issues of homelessness and social justice and to give them experience with homeless services and non-profit management while also providing the organization’s staff and clients with additional support.

**Preferred Participant Qualifications**
GWC is looking for individuals with an interest in homeless services and social justice issues. Individuals in this position must have excellent communication and people skills.

**Experiential Learning**
Through GWC internships, interns will get hands on experience working directly with clients and staff through our services, programs, volunteer and community activities, and administrative projects. They will have opportunities to share insights and debrief their experiences within a weekly supervisory meeting. Interns will get to visit with other organizations doing community work and engage in activities to learn about homelessness and social justice issues while also learning more about themselves and working in a team environment.
